

Forecast conditions represent impacts from smoke. Contributions from ozone and other pollutants are not reflected.

Fire Information: The fire was active in the upper Mono drainage and Ogilvy Ranch area until approximately 3:00AM when the marine layer settled in. Fire crews made good progress improving the road system along Camusa Road and prep work along Pendola jeep trail. Today crews will continue to construct line directly on the fire’s perimeter along the eastern flank; while improving the P-Bar and Pendola contingency lines. Crews will continue to patrol the west end of the perimeter and begin fire suppression repairs. The fire grew to approximately 33,006 and 39% contained. Most of the growth was in the east.

Weather and Smoke Information: Cooler temperatures are expected today with increasing temperatures forecasted for the weekend. Transport winds are expected to be out of the northwest. **San Luis Obispo, Nipomo, Lompoc, Santa Maria, and Santa Ynez** should see **Good** conditions today and tomorrow as transport winds will be out of the northwest. **Goleta, Santa Barbara, and Ojai** may see **Moderate** conditions today and tomorrow.

Smoke Impacts from Local Fires

| Site | Observed Midnight-Midnight August 25, 2016 | Forecast August 26, 2016 | Outlook August 27, 2016 | Worst Time of Day Impacts AQI and Period |
|-----------------|--|--------------------------------|-------------------------------|---|
| San Luis Obispo | Good | Good | Good | May see hazy conditions overnight. |
| Nipomo | Good | Good | Good | May see hazy conditions overnight. |
| Lompoc | Good | Good | Good | May see hazy conditions overnight. |
| Santa Maria | Good | Good | Good | May see hazy conditions overnight. |
| Santa Ynez | Moderate | Good | Good | May see Moderate conditions overnight. |
| Goleta | Good | Good | Good | May see Moderate conditions from around 8:00AM to 2:00PM |
| Santa Barbara | Moderate | Moderate | Moderate | May see Moderate conditions from around 9:00AM to 4:00PM with some smoke overnight. |
| Ojai | Moderate | Moderate | Moderate | Moderate conditions will be from 3:00PM and overnight. |

Colors displayed above correspond roughly with the AQI chart below.

Conditions may change quickly, these projections are based on anticipated weather and fire activity. Sensitive groups including individuals with Asthma, lung or heart disease, children, older adults, and pregnant women should take precautions to avoid exposure to smoke. If you feel as though you are having health effects from smoke see your doctor or health professional as needed. In some cases your eyes are your best tools, if it is smoky outside you are being impacted. Use caution when driving in or around smoky areas.

| AQI Index | Actions to Protect Yourself |
|--------------------------------------|---|
| Good | None |
| Moderate | Unusually sensitive people should consider reducing prolonged or heavy outdoor exertion. |
| Unhealthy for Sensitive Groups - USG | People with heart or lung disease, children and older adults should reduce prolonged or heavy outdoor exertion. Everyone else should limit prolonged or heavy exertion. |
| Unhealthy | The following groups should avoid all physical outdoor activity: People with heart or lung disease, children and older adults. Everyone else should avoid prolonged or heavy exertion. |
| Very Unhealthy | Everyone should avoid any outdoor exertion; people with respiratory or heart disease, the elderly and children should remain indoors. |
| Hazardous | The following groups should remain indoors and keep activity levels low: People with heart or lung disease; children and older adults. Everyone else should avoid prolonged or heavy exertion |
