

## Attachment A: Restricted Material Permit Alternatives and Mitigations Form

Each restricted material permit applicant is required to complete this form and include this information with their restricted material permit application. This information is necessary in order for the restricted material permit application to be deemed complete.

Title 3, of the California Code of Regulations (CCR), section 6426 requires the permit applicant and their pest control adviser consider feasible alternatives before applying for a restricted materials permit. **The requirement applies to all restricted material permit applicants.**

### ***Title 3, CCR section 6426 Alternatives and Mitigation Measures.***

*(a) Each licensed agricultural pest control adviser and grower, when determining if and when to use a pesticide that requires a permit, shall consider, and if feasible, adopt any reasonable, effective and practical mitigation measure or use any feasible alternative which would substantially lessen any significant adverse impact on the environment. NOTE: Authority cited: Sections 11456, 14005 and 14102, Food and Agricultural Code. Reference: Sections 11501 and 14006, Food and Agricultural Code.*

Please list the mitigation measures and alternatives that were considered before applying for a restricted material permit. Attach extra pages if needed.
